PROFESSIONAL SUMMARY

Frontend-focused MERN Stack Developer with over 1 year of experience building API-driven web applications and dashboard systems using React, Next.js, and TypeScript. Strong in reusable component architecture, custom hooks, and modern data-fetching patterns. Recognized for delivering high-quality UI, rapid prototyping, and clean, scalable frontend architecture.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, Shadcn UI

State & Data: Redux Toolkit, RTK Query, TanStack Query, React Hook Form, Zod **Tools:** Git, GitHub, Vercel

PROFESSIONAL EXPERIENCE

Frontend Developer | Betopia Group

March 2025 – Present | Dhaka, Bangladesh (On-site)

- Built reusable frontend abstractions including custom hooks, data tables, modal systems, pagination, and shared layout components to standardize complex UI patterns across multiple modules.
- Developed scalable filtering and data-loading solutions with URL-synced search state, debounced updates, server-aware pagination, and infinite-loading patterns for smoother user workflows.
- Implemented advanced frontend features such as authenticated flows, protected routing, rich-text editing, location autocomplete, validated forms, and backend-integrated interfaces for product-style web applications.

SELECTED PROJECTS

MentorIp Law Firm | Next.js, TypeScript, Tailwind CSS, ShadcnUI

[Live Demo](#) | [GitHub](#)

- A premium, high-performance digital platform for an international Intellectual Property law firm. Features advanced interactive layouts, smooth scroll-triggered animations, and optimized accessibility for global legal services.

Wedding Marketplace & Vendor Platform | Next.js, TypeScript, Tailwind CSS, ShadcnUI

[Live Demo](#) | [GitHub](#)

- Designed a reusable frontend system with App Router route groups, shared UI abstractions, smart filtering, infinite-loading utilities, location autocomplete, and vendor/user dashboard workflows.

Cookbook Recipe & Meal Planner | React, Redux, JavaScript, Shadcn UI

[Live Demo](#) | [GitHub](#)

- Developed modular frontend flows with protected/public routing, shared utilities, debounce-driven interactions, meal-planning workflows, and reusable profile/account features.

EDUCATION

Diploma in Engineering | Dinajpur Polytechnic Institute | 2021–2024

ADDITIONAL TRAINING

Programming Hero — Level 1 completed, currently continuing Level 2

LANGUAGES

English (Comfortable) | Bangla (Native)
